

# Opposing Force (OPFOR) Threat Tactics Course Executive Fact Sheet

## DESCRIPTION

The Opposing Force (OPFOR) Threats Tactics Course (TTC) provides **foundational instruction** on OPFOR concepts and capabilities using functional tactic - a framework for tactical best-practices.

The course leverages **computer-based resources, subject matter experts, real-world case studies, and hands-on practical exercises** to train and educate students on tactical best practices that provide a realistic, challenging adversary as required\* for U.S. Army training events.

## OUTCOMES

Portray a doctrinal, uncooperative adversary to provide better challenges in training

Leverage the functional tactics framework as a lens to understand real-world adversaries and events

## TARGET AUDIENCES

- ◆ **OPFOR personnel:** Accurate portrayal of doctrinal behaviors.
- ◆ **Exercise/Scenario Developers.** More variety, challenge, and options for RTU Commanders.
- ◆ **G2/S2s:** Better ECOA development & improved IPB.
- ◆ **Intel Community.** Understanding of training linkage with real-world analysis.
- ◆ **Multi-service & International Partners:** Understanding and mentoring for coordination, implementation.

### Delivered in 2-Phases

*Accessible to ALL!*

**1. Computer-Based Instruction**  
*Always-available* resource on the G2 Portal

- ◆ Fundamentals
- ◆ OPFOR mindset
- ◆ Selected Tactics

**2. SME-led Instruction**

- ◆ 4-day Foundry-funded MTT
- ◆ OPFOR preferences
- ◆ Drills & Exercises
- ◆ SME coaching

MTT Scheduling based on CTC accreditations, RTU proximity to CTC rotations.

## THE TTC IS NOT

- Current intelligence threat training  
*...but discussions include conceptual linkage w/real-world threats & events*
- IPB training  
*...but enhances & nests within existing IPB processes*
- Passive, “receive only” training  
*...students are hands on with SME coaching to really *absorb* the concepts*
